## PROTECTING VALUABLE PRODUCTS

With the best possible solutions – innovative, tailor-made and sustainable with an eye-catching design.

## PARTNERING WITH OUR CUSTOMERS

An open and honest dialog lays the basis for a long-lasting trusting partnership.

## CONSTANTLY IMPROVING

We are continuously working on improving the efficiency of our material combinations and are making use of the latest industry technologies.

## COMPREHENSIVE PRODUCT RANGE

The universal size of our product range allows for it to be easily managed well throughout the entire logistics process.

**PACCOR**

# PP & PET TRAYS

**attractive product presentation**

**available in many colors**

**large labelling area**

**great stackability**

Excellent filling line performance due to stacking solutions and high quality.

## DUOSKIN TECHNOLOGY

PACCOR offers its customers the revolutionary DuoSkin technology of preprinted film on top of foil, which maintains attractive branding with packaging robustness. Our films can also be used for additional protection of the contents against external factors. These films are usually clear, but on request, they can be decorated with high-quality flexographic or rotogravure printing.

**Varied shapes and tray sizes**

# CONSTANTLY IMPROVING

*Our products are designed and manufactured with a focus on protection, speed, and efficiency. We are continuously working on improving our materials, technologies, and designs, brand differentiation and visual appearance, sustainability and customer experience.*

### **ensured safety**

The trays are accredited by ISO and BRC/IoP, guaranteeing the most stringent standards for fresh food packaging.

### **extended shelf life**

The trays are suitable for Modified Atmosphere Packaging (MAP).

### **optimal absorption**

Absorbers are automatically applied to the packaging to ensure fresh and attractive presentation of the product. Natural cellulose absorbers can be used to fully comply with today's increasingly stringent environmental standards. Many years of experience in the industry and expert knowledge allow us to be flexible in choosing absorbers that best meet customer expectations.

### **perfect skin sealing**

The trays run on most tray sealer lines, and are available in a universal range of sizes. Therefore, creating synergy throughout the logistics process, and in turn lowering cost.
